Industrial **PRESSURE WASHERS** and **PARTS WASHERS**

# Rebel<sup>™</sup>

## Stainless Steel Hot Water Parts Washer

- Compact and mobile
- 120V, 13 amps
- Stainless steel sink, cabinet and sump
- Vertical seal-less pump; no need for costly filters

■ Tri-lingual **Warning Labels** for liability protection.

■ Heavy-duty **Fountain Nozzle** is made of an industrial-strength, metal-lined hose that is flexible, easy to adjust but rigid enough to hold in place.

■ Automatic **Oil Skimmer** made of 304 stainless steel effectively skims suspended oil from 21-gallon sump and automatically deposits it into oil collection container eliminating the need for messy, hazardous oil pads.

■ Time-tested, all-metal, **Vertical Seal-less Pump** tolerates extra-dirty wash water eliminating the need for screens or filtration systems that plug easily and require constant maintenance.

▲ Extra-rugged **Sink and Cabinet** are made of 304 stainless steel; the cabinet is painted with a high-gloss automotive finish; the sink's outer rim features smoothed-over edges and the lip is folded down to create a **Splash Guard**; the sink floor is flat to prevent tools and parts from rolling, and the floor doubles as an easy-to-remove lid for ready access to the 21-gallon sump.

■ Steel, gasket-lined **Electrical Box** is water resistant and hinged for easy access; it doubles as a **Control Panel** for easy-reaching of pump, heater and oil skimmer switches plus the adjustable thermostat.

■ Energy-efficient, 1250W **Calrod Heating Element** raises cleaning solution temperature up to 140°F using 120V AC current and only 13 amps; coated in incoloy sheath for protection against oxidation and corrosives.

■ Four heavy-duty, ball-bearing, swivel **Casters** make moving the Rebel around the shop a breeze; you can even roll it under a raised vehicle so you can wash unremovable parts underneath with the spray gun!

**Solvent FREE!**

■ Automatic **Low-Water Shutoff** valve protects the calrod heating element by preventing the heater from coming on if the water level dips too low. Optional automatic fresh water refill valve is available.

■ 21-Gallon **Sump or Tank** is made of 304 stainless steel and is totally enclosed for retention of heat and reduced exposure to evaporation.

■ Many standard accessories enhance cleaning and convenience, including a flow-through **Scrub Brush** with nylon bristles to reach hard-to-reach areas; a trigger-activated **Spray Gun** for point-and-shoot cleaning of brakes, differential housings and other unremovable parts; an easy adjusting **Work Lamp**; a **Magnetic Tool Bar** for keeping tools nearby; and a **Parts Tray** for placing loose parts and tools so you can always find them.

▲ Motorized components are located on a rear **Recessed Shelf** for easy access but tucked out of the way so they're not damaged when moving.

# Rebel™

## Stainless Steel Hot Water Parts Washer

- Compact and mobile
- 120V, 13 amps
- Stainless steel sink, cabinet and sump
- Vertical seal-less pump; no need for costly filters

### WHY CHOOSE THE REBEL™ PARTS WASHER

As with all products, there are tanks and there are toys. Meet the tank of the parts washer sinks. The **LANDA Rebel™** is the most rugged hot water parts washer sink on the market with its 304 stainless steel sink, tank and cabinet as well as its industrial-duty, time-tested, vertical seal-less pump that eliminates the need for an expensive and maintenance-intensive filtration system. Here's what sets apart the Rebel™ (REB-3626D) from all of the rest:

#### Built to Last

There is no other aqueous parts washer quite like it. From the painted stainless steel cabinet and water-resistant steel control panel to the automatic oil skimmer with stainless steel disc and low-water shutoff protection, the Rebel™ is designed to hold up under the toughest of conditions.

#### User Friendly

There's more to the Rebel™ than being bullet-proof. It is sleek, compact and mobile, plus its many standard features dramatically enhance the cleaning of parts, such as: an easy-to-adjust work lamp; a magnetic tool strip; a flow-through, bristle brush for cleaning; and a trigger-activated spray gun that is designed to clean brakes, differential housings and other unremovable parts. In fact, the Rebel's four casters and spray gun allow you to wheel the sink under a raised vehicle to clean, then capture the water at the same time!

Backed by a one-year warranty and the largest network of industrial cleaning equipment service centers in North America, the Rebel™ will be your final choice in a parts washer.

**No  
Costly Filtration  
System Needed  
Saves You Money &  
Maintenance**

### Optional Add-Ons to the REBEL Aqueous Parts Washer Sink

#### Air-Powered Brush

Easily attaches to an air compressor and spins steel bristles at 1800 RPM to effectively remove stubborn deposits and caked on material.

(Part No. 21-200023)

#### 7-Day Heater Timer

You never have to wait for your cleaning solution to warm up or to remember to turn the heater off for the weekend with this 7-day heating element timer.

(Part No. 21-200273)

#### Auto Fill Valve

The water level of your 21-gallon sump will never run low, causing an untimely shutdown, with the Auto Fill Valve, which automatically injects fresh water as needed.

(Part No. 21-200268)

#### Rebel Wash Detergent

Rebel Wash is a fast-acting, non-foaming, non-caustic liquid detergent with corrosion inhibitors designed for the Rebel parts washer; available in 5 and 55 gallons.

(Part Nos. 9-52005, 9-52055)

#### Extends Solution Life

Portable filtration system suctions spent wastewater, filters suspended solids, and returns cleaned fluid to parts washer tank for longer life and reduced disposal costs.
