

LANDA Pumps

LX Series

The LX series pump is the patriarch of the line, delivering enough volume and pressure for the beefiest of pressure Washer — from 5 to 10.6 GPM and from 2500 to 5000 psi. Its industrial crankshaft is made of a forged, hardened steel material and extends an extra-long 40mm to ensure a sure grip for the belt pulley. The rugged manifold or pump head is made of press-forged brass and is connected to the crankcase with eight 10mm bolts made of 12.9 class steel and coated by a Dacromet® treatment, a world class process that provides up to four times more corrosion resistance than zinc plated bolts.

- Up to 10.6 GPM and 5000 psi
- 10% lower RPM than comparable pumps
- Extra-heavy duty crankshaft and bearings
- 10mm head bolts made of 12.9 class steel
- 7-Year warranty on the oil-end of the pump and lifetime warranty on the brass head or manifold

LT Series

LANDA's unique design that delivers the same performance as other pumps but at 10% lower RPM is also found in the LT series, a Super Duty model that serves as the workhorse for LANDA pressure Washer. It also has an industrial crankshaft and press-forged brass manifold. The valve cages are made of a Zytel® plastic by Dupont and are 33% beefier than those found in other pumps. A unique cap design holds the valve upright and snug eliminating the ever-present potential for a drop in pressure. The heavy-duty ceramic plungers feature a mirror finish produced by a high-precision diamond grinding.

- Up to 6 GPM and 4000 psi
- 10% lower RPM than comparable pumps
- Unique snug-fit design for heavy-duty valves
- Durable ceramic plunger with mirror finish
- 7-Year warranty on the oil-end of the pump and lifetime warranty on the brass head or manifold

LM Series

The LM series is a heavy-duty pump designed for a broad range of applications generally from 4 to 5 GPM and from 3000 to 3500 psi. Along with the many industrial-grade components found in all LANDA Pumps, the LM has a copper-plated plunger guide that is lined inside by a low-friction, teflon-bronze-and-lead bushing for a smoother, long-lasting surface. The LM also has tapered, European-made roller bearings for handling both radial and axial loads, as well as a metal crankcase dipstick with a unique design for ventilating the crankcase.

- Up to 5 GPM and 3500 psi
- 10% lower RPM than comparable pumps
- Copper-plated plunger guide lined with low-friction, teflon bronze and lead bushing
- 7-Year warranty on the oil-end of the pump and lifetime warranty on the brass head or manifold
